

Project Design Phase-II Data Flow Diagram & User Stories

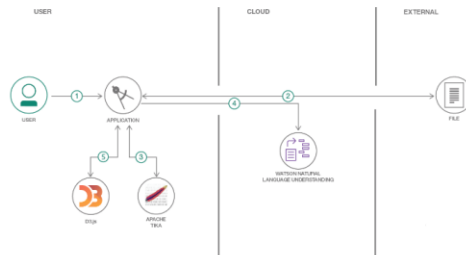

Date	03 july 2026
Team ID	
Project Name	Strategic product placement analysis
Maximum Marks	4 Marks

Data Flow Diagrams:

A Data Flow Diagram (DFD) is a traditional visual representation of the information flows within a system. A neat and clear DFD can depict the right amount of the system requirement graphically. It shows how data enters and leaves the system, what changes the information, and where data is stored.

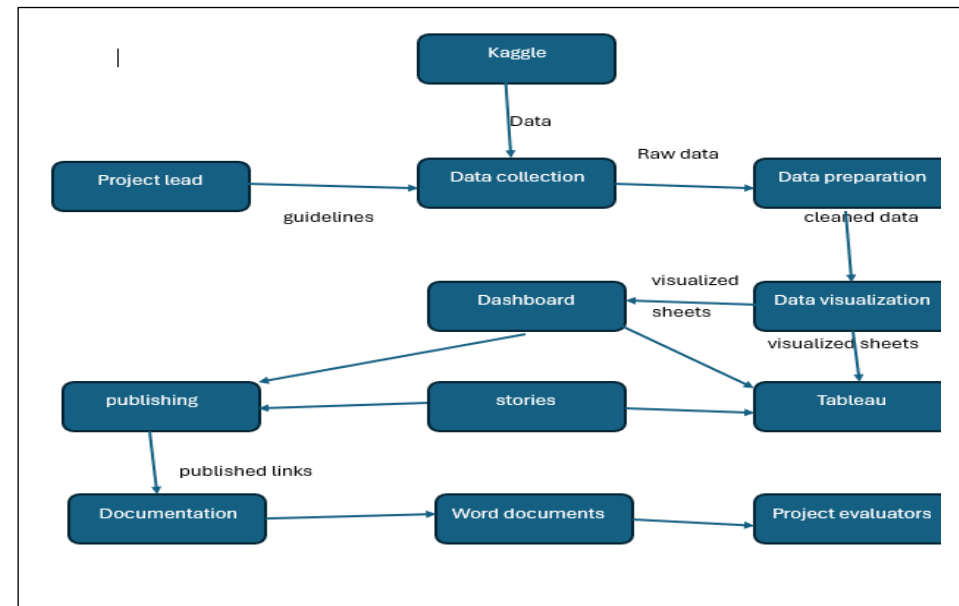

Example: (Simplified)

Flow

1. User configures credentials for the Watson Natural Language Understanding service and starts the app.
2. User selects data file to process and load.
3. Apache Tika extracts text from the data file.
4. Extracted text is passed to Watson NLU for enrichment.
5. Enriched data is visualized in the UI using the D3.js library.

Data flow diagram

User Stories

Use the below template to list all the user stories for the product.

User Type	Functional Requirement (Epic)	User Story Number	User Story / Task	Acceptance criteria	Priority	Release
Customer (Mobile user)	Data collection	USN-1	As a user, I can collect the product placement dataset.	Dataset is collected successfully	High	Sprint-1
Customer (Mobile user)	Data connection	USN-2	As a user, I can connect the dataset with Tableau.	Dataset loads without errors.	High	Sprint-1
Customer (Mobile user)	Data Preparation	USN-3	As a user, I can clean and prepare the dataset for analysis.	Cleaned dataset is ready for visualization.	High	Sprint-1
Customer (Mobile user)	Data Visualization	USN-4	As a user, I can create charts to analyse product placement.	Charts display correct insights.	High	Sprint-2
Customer (Mobile user)	Dashboard	USN-5	As a user, I can view an interactive dashboard for product placement analysis.	Dashboard displays all required K P I's and charts	High	Sprint-2
Customer (Web User)	Story	USN-6	As a user, I can view the story that explains the analysis results.	Story present insights in the correct sequence.	Medium	Sprint-2
Customer Care Executive	Performance Testing	USN-7	As a team member, I can verify that dashboard loads correctly and perform efficiently.	Dashboard loads without errors and meets performance requirements.	Medium	Sprint-3
Administrator	Report Management	USN-8	As an administrator, I can review and manage the final project report and dashboard.	Final report and dashboard are available for submission.	High	Sprint-3
Customer (Web User)	Filter & Search	USN-9	As a user, I can apply filters to analyse product placement by category, brand, or year.	Filters work correctly and update the dashboard instantly.	High	Sprint-3
Business Analyst	Insights Generation	USN-10	As a business analyst, I can identify trends and patterns from the dashboard.	Dashboard provides accurate trends and meaningful insights.	Medium	Sprint-3
Project Manager	Report Exports	USN-11	As a project manager, I can export dashboard and reports in PDF or image format.	Reports are exported successfully without data loss.	Medium	Sprint-3
Administrator	Data Validation	USN-12	As an administrator, I can validate the accuracy and completeness of the dataset before final submission.	Dataset is verified, accurate, and free of inconsistencies.	High	Sprint-3
