

Project Design Phase

Problem – Solution Fit Template

Date	30 June 2026
Team ID	
Project Name	Strategic Product Placement Analysis
Maximum Marks	2 Marks

Problem – Solution Fit Template:

The Problem-Solution Fit simply means that you have found a problem with your customer and that the solution you have realized for it actually solves the customer's problem. It helps entrepreneurs, marketers and corporate innovators identify behavioral patterns and recognize what would work and why

Purpose:

- ☐ Solve complex problems in a way that fits the state of your customers.
- ☐ Succeed faster and increase your solution adoption by tapping into existing mediums and channels of behavior.
- ☐ Sharpen your communication and marketing strategy with the right triggers and messaging.
- ☐ Increase touch-points with your company by finding the right problem-behavior fit and building trust by solving frequent annoyances, or urgent or costly problems.
- ☐ **Understand the existing situation in order to improve it for your target group.**

Template:

Define CS, fit into CC	1. CUSTOMER SEGMENT(S) CS Who is your customer? - Retail store managers - Merchandising and category managers - Retail business analysts - Supermarket and department store owners - Marketing and sales teams - E-commerce retail businesses	6. CUSTOMER CONSTRAINTS CC What constraints prevent your customers from taking action or limit their choices? - Limited visibility into the impact of product placement - Lack of data analysis skills and tools - High cost of advanced analytics solutions - Data quality and integration issues - Time constraints to test and optimize placements - Resistance to change from traditional methods	5. AVAILABLE SOLUTIONS AS Which solutions are available to the customers when they face the problem or need to get the job done? - Manual placement based on experience and intuition - Trial-and-error method in stores - Basic sales reports from POS systems - Excel-based analysis - Third-party merchandising agencies - Generic BI dashboards (not placement focused)	Explore AS, differentiate
	2. JOBS-TO-BE-DONE / PROBLEMS J&P Which jobs-to-be-done (or problems) do your customers need to solve? - Identify the best product placement strategy - Understand product performance by location - Increase sales and revenue - Improve customer experience in-store - Optimize shelf space and layout - Make data-driven merchandising decisions	9. PROBLEM ROOT CAUSE RC What is the real reason that this problem exists? What is the back story behind the need to do this job? - Lack of insights on how placement affects sales - Inability to analyze large volumes of retail data - Multiple factors affect sales (price, promo, location, demand) - No predictive insights for future performance - Lack of tools that combine analytics and recommendations - Changing customer preferences and trends	7. BEHAVIOUR BE What does your customer do to address the problem and get the job done? - Relies on past experience and intuition - Uses basic reports and spreadsheets - Follows competitor or market trends - Frequently changes product placement - Asks for feedback from customers or staff - Monitors sales manually after changes	
Focus on J&P, fit into BE, understand RC	3. TRIGGERS TR What triggers customers to act? I.e. reason their pain/gain is activated. - Declining sales or slow-moving products - Low product visibility or customer engagement - Seasonal changes or new product launches - Competitor promotions and offers - Need to improve store layout and efficiency	10. YOUR SOLUTION SL If you are working on an existing business, write down your current solution first, then the new canvas, and check how much it fits here. Strategic Product Placement Analysis System - Collects and integrates sales, product, customer and store data - Analyzes product performance by location and category - Uses machine learning to predict best product placement - Provides actionable recommendations for shelf optimization - Interactive dashboards and visual reports - Helps increase sales, product visibility and customer satisfaction	8. CHANNELS of BEHAVIOUR CH 8.1 ONLINE - Web application / dashboard - Email reports and alerts - Website and customer portal - Social media (LinkedIn, Facebook) - Online tutorials and help guides - Webinars and demo sessions 8.2 OFFLINE - In-store meetings and presentations - Workshops and training sessions - Printed reports and manuals - Phone support and consultations - Industry conferences and events	Extract online & offline CH of BE
Identify strong TR, EM	4. EMOTIONS: BEFORE / AFTER EM How do customers feel when they face a problem or a job and afterwards? Before: Unsure, confused, worried about low sales and wrong decisions After: Confident, satisfied, clear insights, higher sales and happy customers
